

# **Falcon Field Airport Construction Project**

## **Taxiway Bravo Reconfiguration & Installation of Runway Guard Lights**

Construction began in January at Falcon Field Airport to remove asphalt along Taxiway B, construct new, angled exits at the intersections and install elevated runway guard lights. The project will improve safety and is being completed in two phases, one runway at a time, so flights can continue.

The first phase of construction , approximately 40 percent complete as of Feb. 2, is shown in the following pictures. The \$1.65 million project is funded largely by federal and state grants.
